Office Action Summary

Art Unit: 2152

1. Claims 1-18 are presented for examination.
2. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,128,647. Although the conflicting claims are not identical, they are not patentably distinct from each other because present claims are substantially taught by the same inventive entity in above mentioned U.S. Patent No. 6,128,647. The difference in scope is not substantial enough, e.g., applicant only added the word "asynchronous" to the claims, therefore, it would have been obvious for one of ordinary skill in the data processing art to bridge what was taught before and what is disclosed in the present application. Applicant may overcome this rejection by a suitable crafted terminal disclaimer.
